Weatherization

Weatherization work aims to make the home more energy efficient and comfortable. We target several areas with our work:

- Building Shell Measures
 - Second level indent
- Healthy & Safety Measures
 - Wall, floor, ceiling and attic insulation.
- Electric Baseload Measures
 - Install efficient light sources.
- Mechanical Measures
 - Clean/tune/repair/replace heating and cooling systems.

SAVE MONEY.

Funding Sources

Where does our funding come from?

Funding

We have several Federal and State grants that fund our program.

- Department of Energy (Federal).
- Department of Housing and Community Development (State).

Our grants can help both homeowners and renters.

We can also utilize some of our funding to provide weatherization services for shelters and group homes.

Eligibility and Applying
Please apply to our program!
